SCHEDULE OF APPROVED RATES

Rates for water service for Connecticut Water Company were approved by the Department of Public Utility Control (DPUC) in Docket 09-12-11 effective July 14, 2010.

The charges for all customers include a **Basic Service Charge** and a **Commodity Charge**. The Basic Service Charge is applied each billing period to help cover certain fixed costs such as meter reading, testing and replacement, bill preparation and processing, etc. *These Basic Service Charges are applied even if there is no consumption at a premise during a particular billing period.* The Commodity Charge is determined by the amount of water used during the billing period. The commodity charge shows on the bill in units of gallons or cubic feet depending on how the meter installed at your premises records the usage.

Most customer bills are issued once per quarter, though larger volume users including commercial and industrial customers are generally billed once per month. The number of days in a billing cycle may vary slightly, but your service charge and consumption reflect the usage and billing period for your account. Your bill is the combination of the Basic Service Charge for the meter size at your account, the amount of water used during the billing period times the Commodity Charge for your customer class, as well as any other special charges or interest due on your account.
