For Immediate Release

Connecticut Water investing nearly \$1 million to replace 1,800 feet of aging water main in East Windsor

East Windsor, Conn. — April 20, 2018 — Connecticut Water announced that it will be replacing 1,800 feet of water main along North Road (Route 140) in East Windsor between Prospect Hill Road (Route 5) and Shoham Road. The main was installed more than 50 years ago. Work is expected to begin on Sunday evening, April 22, at the intersection with Shoham Road. The project is expected to be completed by early July.

“This project will improve reliability of water service, enhance water quality and supply more water to hydrants along the road,” stated Craig J. Patla, Connecticut Water’s vice president, service delivery. Mr. Patla added that the project is being done through the company’s Water Infrastructure and Conservation Adjustment (WICA) program. Through WICA, the company may charge customers a small surcharge on their bills for projects to invest in replacing aging water mains or for conservation-related projects.”

Since the inception of the WICA program in 2007, Connecticut Water has invested more than \$139 million and replaced more than 118 miles of water main with an average age of 76 years. Connecticut Water owns 1,600 miles of water main across the state.

Work hours for the project will be from 8 p.m. to 5 a.m., Sunday through Thursday, as directed by the Connecticut DOT.

Customers will be contacted directly by Connecticut Water with additional information on the project and advance notice will be given before any planned service interruptions related to the water main replacement.

Updates on this and other construction projects will be available on Connecticut Water’s website, www.ctwater.com/projects.
