Dear Resident:

Connecticut Water Company (CWC) will be installing water main in your area starting on or about June 21, 2021. The work hours will be 7 a.m. to 4:30 p.m., Monday through Friday. We expect the project to be complete by the end of September.

Please use caution in the construction work zone. Our work will involve trenches that may be 6 feet deep. Our contractor will take all required safety measures to ensure the work area is safe, including: appropriate signs, barricades, and traffic control. At times traffic lanes may be restricted. Restoration work, such as repaving of driveway aprons and restoration of grass along the curb line, will take place when the project is fully completed. Due to seasonal constraints around paving and planting, the restoration work may take place several weeks after we have moved through your area.

Our team has adopted precautions to work safely during the pandemic. If you see those on the job, we ask you to maintain a minimum distance of six feet. This helps us protect the people who help ensure that clean, safe water reaches your tap 24 hours a day, 365 days a year. Additional information can be found at ctwater.com/projects. Specifics, including scheduled service interruptions, will be communicated by phone, text and e-mail messages. You will only receive these notifications if we have your contact information. Please visit ctwater.com/notification to provide your contact information for future notifications.

Thank you for your patience and understanding as we work to improve our infrastructure to better serve our customers. If you have any questions concerning this project, please contact Dwayne Peart, Project Coordinator, Distribution System Engineering, at 860-389-4082.

Sincerely,

A handwritten signature in blue ink, appearing to read "Rose M. Gavrilovic".

Rose M. Gavrilovic, P.E.
