

**For Immediate Release**

## **Traffic Detour on Depot Hill Road in Enfield and North Main Street in East Windsor, Route 510, beginning July 19 Necessary for water main replacement project**

**Enfield, Conn. — July 14, 2021** — Beginning on Monday, July 19, 2021, Depot Hill Road in Enfield and the adjoining section of North Main Street in East Windsor will be closed to thru traffic between Routes 5 (King Street) and 140 (Bridge Street) during the hours of 7 a.m. and 5 p.m., Monday through Friday. Motorists will not be able to use Depot Hill Road and North Main Street as a thru travel route. Local travel by residents, school buses and customers and employees of businesses in the work area will be allowed and driveway access will be maintained. Business in the work area will be open.

The detour route will encompass Routes 5 and 140 and is expected to be in place through mid-September so that 7,000 feet of water main, or more about 1.3 miles, can be replaced. The entire project is expected to be completed by the end of October.

“The water main being replaced is 60 to 80 years old and is a mix of 6 inch and 8 inch in diameter. The new pipe will be mostly 8 inch in diameter, which will improve water system reliability and increase the flow of water available to fire hydrants,” stated Craig J. Patla, Connecticut Water’s vice president, service delivery. Patla added that the project is being done through the company’s Water Infrastructure and Conservation Adjustment (WICA) program.

The establishment of a detour, as compared to a partial road closure, will allow the project to be completed as quickly and safely as possible.

Additional information will be available on Connecticut Water’s website at [www.ctwater.com/projects](http://www.ctwater.com/projects). Customers in the work area have also been notified about the project.

Connecticut Water reminds motorists to be alert and the drive cautiously through construction areas to safeguard the lives our employees, contractors, police officers, and others on the jobsite. People should allow for extra travel due to the detour.

### **About Connecticut Water**
